at the RISE End of Year Celebration

RISE (Regional Internships in Science and Engineering) is a career and professional development program, providing meaningful work experience and professional relationships with local construction and engineering firms, consultants and planners to prepare students for success in the Greater Milwaukee infrastructure job market. For over 15 years, the RISE program has touched over 120 students and 50 employers.

Selected students are placed in paid summer internships with engineering firms, project consultants and contractors affiliated with the District, however, the work the students do may or may not be related to MMSD operations. The goal of the program is to provide a internship experience for students and employers ultimately leading to a professional experience. However, there are no requirements for students or employers to maintain their affiliation.
